TRIP LOG INFORMATION

1) All trips need to be reported even if public land was not used
or money was not received (i.e. comp trip). Include training trips
and any trips using only private lands. We need to get complete
information on the amount of use on the public lands. This will
help us when it is time to update our management plans.

2) Identify all sites used on your trips. This will help us to
determine site utilization and to prioritize the sites for
improvements.

3) Trip types include whether it was a full day, half day,
training, overnight, fishing, etc. This information will be used
to determine what types of improvements are needed at existing
sites and what types of sites may be lacking.

4) The number of clients and staff are used to determine the
number of user days on the public lands and also to determine
average party size.

5) Gross receipts information is required daily for <u>all</u> trips
involving public lands. <u>ALL</u> fees collected from your guests must
be included for trips using public lands.
